DECAST GROUP

decast.com

Dear colleagues,

Decast is a Russian manufacturer of innovative water and heat meters and the developer of the Decast.Cloud digital platform. We have been offering the market in-demand products of the highest quality since 1994.

Our product portfolio includes a wide range of meters with various features that are designed for various applications, from simple classic modifications to smart IoT-based devices. Our proprietary software for collecting and transmitting data allows our solutions to be easily integrated into the smart home ecosystem.

Decast is a reliable partner and stable supplier of domestic, communal and industrial equipment.

CEO of Decast Group
T.V. Derevyanko

DEKACT

Company Timeline

Mission and Values

We create innovative products to preserve the planet's resources
and ensure people's comfort!

Professionalism

We take a professional approach in everything — from the development of our product to collaboration with our customers and partners.

Teamwork

Our team is our driver!
We are open to collaboration and result-oriented, we trust and help each other, we grow and improve.

Leadership

We are constantly evolving and open to new initiatives — this is how we maintain our leading position in the market! We are always looking for new solutions and confidently moving towards our goals.

Communication Skills

Communication with colleagues and partners is the key to our success! We build transparent and open communication within the Company, we listen to each other, take everyone's opinion into account, and promptly make decisions that are important to us and our partners.

Good Faith

We are honest, reliable and fair in our work!
Our actions bring recognition and respect from colleagues and partners.

Innovation

We build our Company on innovation, implementing advanced technologies and offering new products and solutions to the market.

DEKAST

Own Production and Development Staff

Decast produces and develops its own products and is not dependent on finished products from third-party manufacturers

In-house metrological service

Full metrological support for our own manufactured products:

- initial verification
- periodic verification
- repair of measuring instruments and after-repair verification

Decast has its own laboratory accredited to verify hot and cold water meters, as well as heat meters.

The production unit is located in the Stupino district of the Moscow region (SEZ Stupino Kvadrat).

DEKACT

Decast System

Lower level

Decast metering devices:

- Household water and heat meters
- Communal meters
- Industrial meters

Transportation level

Devices:

- RS-485 interface converter
- LTE gateway
- LoRaWAN base station with Decast configuration

Ready-to-install cabinets:

- 8RS Decast cabinets for automated water and heat supply monitoring and metering systems
- 8RS-LTE Decast cabinets for automated water and heat supply monitoring and metering systems

Upper level

Decast Server software package in the following versions:

- Decast Server Mini
- Decast Server Unit
- 8RS Decast Server Cabinet
- Decast Cloud

Decast System is a system designed for:

- metering the consumption of electrical energy, thermal energy and the amount of coolant, as well as the consumption of cold and hot water, natural gas;
- automatic collection, accumulation, processing, storage, display and transmission of data on energy consumption to control and billing centers, as well as to other systems of the Upper Level.

DEKACT

Lower level Decast metering devices

Household water and heat meters

VSKM DG, VSKM iWAN, VSKM iWAN RS-485,
VSKM iWAN (NB-IoT), STK MARS NEO RS-485,
STK MARS NEO LoRAWAN,
STK MARS NEO Imp

Industrial meters

STVH/STVU (MID I, MID RS-485, MID R (NB-IoT VA)),
STVK (Du 50/15, 80/20, 100/20, 150/40) (DGR),
STVH STREAM (Du 50, 65, 80, 100, 150, 200)
of metrological class C

Communal meters

OSVH/OSVU (Du 25, 32, 40), VSKM 90(X)
(MID I, MID RS-485, MID R (NB-IoT VA)),
VSKM 90 ATLANT (Du 25, 32, 40, 50),
VKM (Du 25, 32), VKM M (Du 25, 32, 40, 50),
OSVH/OSVU NEPTUN (Du 25, 32, 40),
OSVH NEPTUN (Du 25, 32, 40)
of metrological class C

DEKACT

Transportation level Devices

RS-485 interface converters

Designed to connect devices with an RS-485 interface to Decast Server via Ethernet. Possible number of RS-485 ports: 1, 2, 4, 8. Possibility of serial connection to each other. Transparent operation mode of RS-485 ports.

LoRaWAN base station

Designed to connect devices with a LoRaWAN interface to Decast Server. Mounting kit (optional) (antenna, mast, brackets). Decast configuration.

LTE gateway

Designed for channel reservation via LTE for RS converters.

Ready-to-install cabinets

8RS Decast cabinets for automated water and heat supply monitoring and metering systems

8-port RS-485 converter

16RS Decast cabinets for automated water and heat supply monitoring and metering systems

2x8-port RS-485 converters

8RS-LTE Decast cabinets for automated water and heat supply monitoring and metering systems

8-port RS-485 converter and LTE gateway

ДЕКАСТ

Upper level Decast Server software package

Automated consumption data collection for all types of energy resources at various metering levels (water supply, electricity, heat, gas)

Modern tools for automated energy metering

Data transmission scheme of metering devices

DEKACT

Useful tools for working with us

Project sales

Reliable protection of construction sites

Item registration and price quotation

Participation in tenders

Reliable protection of tender transactions

Assistance in tender participation

Database of meters from Russian manufacturers

Convenient selection of competitors' analogues

Independent selection of similar equipment

Photobank

Quick search for equipment photos

High-quality photos of devices from all angles

Events for partners

Exhibitions and conferences

Seminars and webinars

On-site visits to production facilities

Benefits of working with us

Benefits of interaction

Reliable

We have been engaged in engineering for over 30 years. We are trusted by partners and dealers throughout Russia.

Quick

Our own warehouse facilities in Stupino (Moscow Region) allow us to deliver your order at a time convenient for you to anywhere in Russia and the CIS.

Convenient

Our employees will provide consultation and select the most suitable solution for your needs.

Quality

The quality of Decast Group products is confirmed by leading Russian and international standards.

Easy

On decast.com, you can find all the information you need, select devices, and review product documentation and certificates.

High quality products

Metrological accuracy

Absolute metrological accuracy of measurements over a wide range of flow rates is maintained throughout the entire service life

Reliable devices

Cost balance

Accurate resource accounting means lower costs for consumers and minimized resource consumption costs for businesses

Innovation

Time proved

Vast experience in the development and production of water and heat meters — 30 years at the peak of resource saving

Safety

Accounting and analytics

Innovative solutions for energy consumption monitoring and analysis systems that optimize your costs

Russian product

Innovative metering devices manufactured in Russia, with a localization level of over 70%. Domestic software — in-house Decast.Cloud digital platform
